Lake database de PRITA en Synapse

Tabla (identifier)	Alias dbt	Descripción	Columnas documentadas
control_raw_file_status	control_raw_file_status	Tabla de control que registra el estado de cada archivo/batch procesado por los notebooks de ingesta.	5

Columnas documentadas: control_raw_file_status

Columna	Descripción
filename	Nombre del archivo o batch procesado
status	Estado del procesamiento (processed, failed, skipped)
process_datetime	Timestamp de cuando se proceso
error_message	Mensaje de error si hubo fallo (NULL si exitoso)
record_count	Cantidad de registros procesados

HMS ferry maritime service data - raw external tables from data lake

Tabla (identifier)	Alias dbt	Descripción	Columnas do
--------------------	-----------	-------------	-------------

hms_trips	hms_trips	Raw HMS monthly trip data loaded from CSV files via Synapse notebook. Each row represents a scheduled ferry trip with ac	25
-----------	-----------	--	----

Columnas documentadas: hms_trips

Columna	Descripción
Id	Auto-generated row identifier
Month	Month name (e.g., 'January', 'February')
Date	Service date of the trip
Day	Day type: 'Weekday' or weekend day name
Vessel	Ferry vessel name
Route	Route identifier (e.g., 'Fajardo-Vieques')
Scheduled_Departure_Time	Scheduled departure datetime
Actual_Departure_Time	Actual departure datetime
Origin	Origin terminal name
Destination	Destination terminal name
Arrival_Time	Actual arrival datetime
Travel_Time	Travel time in HH:MM format
PAX	Number of passengers
Vehicles	Number of vehicles
Variance_Schd_vs_Act	Variance between scheduled and actual departure
Val	Validation flag
OTP	On-time performance status: 'ON-TIME' or 'DELAYED'
Trip_Status	Trip status: 'COMPLETED' or 'MISSED TRIP'
Miles	Trip distance in miles
Comments	Additional comments
Trip_Type	Type of trip
Travel_Time_Minutes	Travel time in minutes (calculated)
DayOfWeek	Day of week as integer (0=Sunday, 1=Monday, ...)
_md_filename	Source filename (metadata)
_md_processed_at	Processing timestamp (metadata)

Source: hms_output

Database: ati_datawarehouse · Schema: dbo · Tablas: 2
HMS output tables in dbo schema - registered for post-hook references

Tabla (identifier)	Alias dbt	Descripción	Columnas do
HMS_MonthlyDataTrip	HMS_MonthlyDataTrip	Transformed HMS trip data with calculated fields	—
HmsNtdData	HmsNtdData	Aggregated NTD (National Transit Database) metrics	—

Source: korbato

Database: ati_datawarehouse · Schema: dbo · Tablas: 6
korbato source tables from dbo schema

Tabla (identifier)	Alias dbt	Descripción	Columnas do
fleet	fleet	—	—
trip	trip	—	—
trip_sch_match	trip_sch_match	—	—
vehicle_day	vehicle_day	—	—
visit	visit	—	—
vwRoutes	vwRoutes	—	—

Source: sonnell

Database: ati_datawarehouse · Schema: dbo · Tablas: 7
Sonnell source tables from dbo schema

Tabla (identifier)	Alias dbt	Descripción	Columnas do
SonnellCheckpoints	SonnellCheckpoints	Checkpoint-level OTP compliance data per trip/visit with Compliant flag (t/f)	—
SonnellDailySummary	SonnellDailySummary	Daily summary of Sonnell subsystem revenue metrics (hours, miles, trips) by route and subsystem	—
SonnellInvoiceTotals	SonnellInvoiceTotals	Original invoice totals table (pre-dbt); referenced for legacy compatibility	—
SonnellOffsetApplied	SonnellOffsetApplied	Audit table for the 4% offset cap rule per (Year, Month, Subsystem)	—
SonnellParameters	SonnellParameters	OTP threshold ranges and incentive/offset rates per subsystem (GroupId)	—
SonnellRates	SonnellRates	Rate cards for Sonnell subsystems with effective date ranges	—
SonnellSubsystemCost	SonnellSubsystemCost	Target fact table for Sonnell subsystem costs with SCD Type 2 versioning	—
